

Lab 4 — Vibe Coding Chat History

Assigned repository: SETAPESU26/24_treasure_hunt

Note: This document records the prompts and implementation summary used for the completed Lab 4 work. For submission, include the actual ChatGPT conversation/export link required by the repository README if your instructor expects the platform's complete conversation history.

Prompt 1 — Inspect the project

Inspect the assigned Treasure Hunt Python/Pygame project and explain its existing architecture, including generate_world, Player, Game

Prompt 2 — Task 1: Traps

Implement Task 1 from the README: add floor traps that send the player back to the starting position when stepped on, and show a clear

Prompt 3 — Task 2: Enemy Guard

Implement Task 2 from the README: add a guard that patrols back and forth between two points near the chest. Touching the guard mu

Prompt 4 — Task 3: Mini-map

Implement Task 3 from the README: draw a small real-time mini-map in a screen corner, distinguish walls from floor, and mark the playe

Prompt 5 — Task 4: Inventory

Implement Task 4 from the README: show an inventory slot that is empty initially and displays a key icon immediately after the key is co

Prompt 6 — Integration review

Review the complete implementation against all four README tasks and the required testing scenarios. Check traps, guard collision, min

Implementation result: game.py was completed with all four requested features while retaining the original Treasure Hunt structure and pygame dependency.
